SEHSC's Commitment to Silane

Subject Dichloro(chloromethyl)methyl (CAS No. 1558-33-4) and Request for U.S. Sponsorship under the OECD SIDS Program

Mr. Hernandez,

The Silicones Environmental, Health and Safety Council (SEHSC) respectfully requests that Silane dichloro(chloromethyl)methyl (CAS No. 1558-33-4) be added to the SEHSC/CES/SIAJ consortium's commitment to the ICCA Global Initiative on HPV Chemicals as a member of the Chlorosilanes Category for the test year 2001. The attached documents contain the formal request from SEHSC and Wacker Chemical Corporation, as well as the revised Test Plan for the Chlorosilanes Category. The revisions to the Category Test Plan have been in track changes for easy identification. I will be sending the robust summaries (IUCLID) for silane dichloro(chloromethyl)methyl in a separate e-mail, as the files are too large to send at one time.

If you have any questions or need additional information, please do not hesitate to contact me at (703) 788-6562 or thill@sehsc.com. Thank you.

Tracy Hill

Re: U.S. Sponsorship of Silane dichloro(chloromethyl)methyl (CAS No. 1558-33-4) under the
OECD SIDS Program

Dear Mr. Hernandez:

The Silicones Environmental, Health and Safety Council (SEHSC) requests that Silane dichloro(chloromethyl)methyl (CAS No. 1558-33-4) be added to the SEHSC/CES/SIAJ consortium's commitment to the ICCA Global Initiative on HPV Chemicals as a member of the Chlorosilanes Category for the test year 2001. Silane dichloro(chloromethyl)methyl (CAS No. 1558-33-4) is among the HPV materials identified under the ICCA Global Initiative on HPV Chemicals and the U.S. EPA HPV Challenge Program and is not sponsored by any country under the OECD SIDS program.

SEHSC further requests that the United States, represented by the U.S. Environmental Protection Agency, agrees to be the OECD member country sponsor for silane dichloro(chloromethyl)methyl (CAS No. 1558-33-4) under the OECD SIDS program. The addition of this material should not cause the U.S. Environmental Protection Agency any additional work because silane dichloro(chloromethyl)methyl (CAS No. 1558-33-4) is clearly a member of the Chlorosilane Category, as demonstrated in the attached robust summaries (IUCLID). Please let me know whether the United States, represented by U.S. EPA, will sponsor this material under the OECD SIDS program.

If you have questions about this request, please contact Tracy Hill at (703) 788-6562 or thill@sehsc.com.

Sincerely,

Reo Menning
Executive Director

**Re: Sponsorship of Silane dichloro(chloromethyl)methyl (CAS No.: 1558-33-4) under the OEC
SIDS Program**

Dear Mr. Hernandez:

Wacker Fine Chemicals respectfully requests that Silane dichloro(chloromethyl)methyl (CAS No.: 1558-33-4) be added to Wacker Chemical Corporation's commitment to the ICCA Global Initiative on HPV Chemicals.

Wacker Chemical Corporation has been informed by the Silicones Environmental, Health and Safety Council (SEHSC) that this unsponsored HPV chemical can be added to the SEHSC/CES/SIAJ consortium's commitment to the ICCA Global Initiative for the test year 2001 as a member of the Chlorosilanes Category. Addition of this chemical should not cause the EPA any additional work because the Silane dichloro(chloromethyl)methyl is a definite member of this category and the supporting documents for the chlorosilanes clearly support this substance as well. SEHSC will submit the revised test plan and robust summaries (IUCLID) by no later than December 31, 2005.

Therefore, Wacker Chemical Corporation asks that Silane dichloro(chloromethyl)methyl (CAS No.: 1558-33-4) be added to Wacker Chemical Corporation's commitment to the ICCA Global initiative on HPV Chemicals for the test year of 2001. Wacker Fine Chemicals is a Subsidiary of Wacker Chemie AG in Germany and in the United States it is legally tied to Wacker Chemical Corporation.

If there are any questions on this request, please do not hesitate to contact me at the numbers or address above.

Sincerely,

Sharronn E. Etter
